Review and Remove

[Downloader_setup_mac Dmg](#)

Need help to remove adware downloader_setup_mac dmg! Some how it seems that I have downloaded adware / malware.. app itself --nothing else at all This seems a bit strange Version 1 0 beta This is the first release of the popular Windows video downloading software for the Mac operating system.. I Need help to remove downloader_setup_mac dmg (I believe this is the culprit) I have downloaded TSM adware removal and it has not helped.. Hi, the dmg file I had contained an installer app and I installed JD with that However, there is no uninstaller and when I deleted the JD with Clean My Mac or Appcleaner, they only find the JDownloader.. Just like you were used to on the Windows version, you can download videos from your favorite websites.
